

Cued Speech Order Form:

Complete spoken language
through vision

Books, Videos and Information Sheets

Parent's Booklet: - available to download from our website

Order more copies at the special charity price: £2.00 (incl. p&p), free to parents of deaf children and to deaf people.

Video on DVD or VHS - Cued Speech explained by people who use it

British Sign Language interpretation and open subtitles.

Parents of deaf children and young people brought up with Cued Speech are amongst those who give first-hand accounts. Cuers contribute an overview of what Cued Speech is and why it works.

This video is essential viewing for:

- parents of deaf children
- professionals
- deaf and deafened people interested in accessing English through vision.

Running time, 17 minutes.

Order more copies at the special charity price: £5.00 (inc. p&p) Free to parents of deaf children and to deaf people.

The Cued Speech Resource Book for Parents of Deaf Children

by R.Orin Cornett, Ph.D. & Mary Elsie Daisey, M.Ed.

A 'must have' for parents and anyone who takes an active part in the education of deaf children.

"This is an easy to read book to 'dip into' which contains a huge amount of information and positive encouragement. Factual and well researched, it supports Cued Speech with many examples and essential tips for parents. I wish it had been available years ago when my profoundly deaf children were young."

Includes:

- getting started
- materials & activities
- language development
- auditory training
- speech development
- reading
- beginning with a very young child
- beginning with an older child
- what about sign language?
- answers to frequently asked questions

- This hardback, 880 page, American Book is a comprehensive source of information for parents and others.
- It allows readers to "get inside" the minds of 36 young deaf people by reading their observations about life, family, friends, school, reading, frustrations, pleasures, and their futures.

Please note:

Cued Speech is a sound-based language tool. All the general information about Cued Speech is relevant in any language. However, this is an American book and some of the sounds used by speakers of American-English differ from those used in the UK. Therefore, there are a few pages in the book which are not relevant to speakers of English in the UK.

Price: £29.00 (incl. p&p)

Instructional Booklet

Originally written for children by experienced cuer and teacher of the deaf, Sheila Skillings, this booklet is clear and concise. It is useful for all students and prospective cuers of any age. Softback, 76 pages. **Special charity price: £6.00 (incl. p&p)**

Instructional Video

Presented by experienced teachers of the deaf with many years' cueing experience, this video covers all the basic skills of cueing in Standard English. It is clear and easy to follow. Although face-to-face tuition is recommended, this video will allow those not able to attend a course to learn to cue. It is also invaluable for practice following a course or to brush up rusty skills. Because Cued Speech is a sound-based system this is not suitable for people who are unable to hear the sounds of speech. The Cued Speech Association provides free face-to-face tuition for deaf people. Running time, 3 hours 17 minutes. **Price: £10.00 (incl. p&p)**
